

# SimpleKey Web

SimpleKey Web is the user interface for SimpleKey hardware controlling and monitoring access into residential housing blocks using 4G and broadband communications.

## Features & Benefits

- **Cloud Based Administration** - designed for use on all types of internet connected device including Smart Phones, Tablets, Laptops & Desk PC's.
- **4G/Broadband Real Time Communications** - via 4G mobile or a wired broadband link connection, which is simply and reliably achieved with 'plug & play' communication interfaces. The 4G version is supplied with a fully roaming SIM providing improved coverage.
- **Pre-programmed Shark Tooth Fobs** - enables new or replacement fobs to be simply assigned or reassigned.
- **Fob Usage Reports** - includes custom, excessive, unused and expired.
- **Area & Group Configuration** - simplifies how the system is managed by allowing housing area/estates/user groups etc. to be managed collectively.
- **Universal Search Bar** - allows the intuitive management of resident and staff/contractor fobs, with search as you type feature.
- **Activity/Alarm Monitoring** - events and system alarms (i.e door forced/left open) to be reported, with the option of predetermined alerts being sent out using email.
- **Mapping** - with block locations and addresses displayed on interactive maps, providing a graphical overview of the system.
- **Door Unlock Invitation** - generated and sent via email to visitors to the block(s), allowing a one off or multiple entries without the need of a fob in a set time period.
- **Digital Notice Board** - providing residents with up to date messaging and advice.

## Options

- Many existing KMS or non KMS systems can be upgraded to work on SimpleKey Web, often utilising most of the existing hardware & fobs.
- Additional functions like lift control, door monitoring & integration with fire & safety systems can simply be incorporated.
- Every system brought online to the SimpleKey Web System, is remotely commissioned by KMS ensuring good communications & the installation is functioning correctly to meet the site requirements.
